SUMMARY

Computer Science undergraduate specializing in Cybersecurity, Artificial Intelligence, and Software Engineering. Designed and delivered 6 production-ready projects spanning penetration testing automation, phishing detection, AI agents, and full-stack web applications. Certified Network Security Practitioner (CNSP) with hands-on experience in vulnerability assessment, secure coding, network reconnaissance, and AI-driven security automation. Seeking a Cybersecurity or Network Engineer Internship.

TECHNICAL SKILLS

Languages: Python, JavaScript, C, SQL, HTML5, CSS3, Bash
Frameworks and Libraries: React.js, Node.js, Express.js, FastAPI, LangChain, LangGraph, scikit-learn, Hugging Face Transformers
AI and Machine Learning: Machine Learning, Reinforcement Learning, Generative AI, RAG, AI Agents, Prompt Engineering, LLM Security
Cybersecurity: Penetration Testing, Vulnerability Assessment, Web Application Security, Network Security, Threat Detection, Incident Response, Cryptography, Secure Coding, OWASP Top 10
Networking and Systems: TCP/IP, DNS, Firewalls, VPNs, Routing and Switching, Linux Administration, Windows Security
Security and Developer Tools: Nmap, Burp Suite, Wireshark, Nessus, OWASP ZAP, Splunk, Git, GitHub Actions, Docker, Postman, VS Code, Kali Linux
Cloud, Databases, and Deployment: AWS, Google Cloud Platform, MongoDB, PostgreSQL, ChromaDB, FAISS, Vercel, Render
Software Engineering: REST API Development, CI/CD Pipelines, Version Control, Agile Development

EDUCATION

HKBK College of Engineering – VTU <i>Bachelor of Engineering in Computer Science and Engineering</i> SBR Pre-University College, Bidar <i>Class XII, Science Stream</i>	Bangalore, India 2023 – 2027 Karnataka 2023 80%
--	--

PROJECTS

Veltrix AI | *FastAPI, scikit-learn, TF-IDF, Logistic Regression, Chrome MV3, Flutter* [GitHub](#)
• Designed and deployed an end-to-end phishing detection platform achieving **95%+** classification accuracy using TF-IDF and Logistic Regression across email, URL, and web content threat vectors.
• Extended threat coverage across **2 platforms** by building a Chrome Manifest v3 extension for real-time URL scanning and a Flutter Android application for on-device phishing analysis.

OpenDev AI | *Python, FastAPI, Q-Learning, Gemini, Groq, GitHub API* | *2nd Runner Up* [GitHub](#)
• Architected an autonomous GitHub security agent using LLMs and Q-Learning to scan **5+ vulnerability categories**, detect exposed secrets, and auto-generate remediation pull requests with zero manual intervention.
• Integrated Gemini and Groq APIs for AI-driven code analysis, reducing estimated manual security review effort by **70%** per repository audit.

ExploitIQ | *Python, FastAPI, Nmap, Nikto, Searchsploit, WebSocket, Groq LLM* [GitHub](#)
• Built an autonomous AI penetration testing assistant that orchestrates **4 security tools** (DNS reconnaissance, Nmap, Nikto, Searchsploit), with Groq LLM generating structured vulnerability reports via real-time WebSocket streaming.

GeoAgent | *FastAPI, LangChain, ChromaDB, Hugging Face, Groq LLaMA 3.1, RAG* [GitHub](#)
• Architected a production-ready **6-agent** AI system (Planner, Explorer, RAG, Weather, Safety, Aggregator) delivering personalized travel intelligence through retrieval-augmented generation and real-time API integrations.

ML Keylogger Detection System | *Python, scikit-learn, Network Traffic Analysis* [GitHub](#)
• Developed a defensive machine learning classifier that detects keylogger activity from network traffic patterns, achieving behavioral anomaly detection **without endpoint access** or keystroke capture.

Google Dorking OSINT Automation Tool | *Python* [GitHub](#)
• Automated **20+ Google Dork** queries to surface publicly exposed credentials, configuration files, and server misconfigurations, accelerating OSINT reconnaissance and security audit workflows.

CERTIFICATIONS

Certified Network Security Practitioner (CNSP) – The SecOps Group	Jan 2026
Introduction to Model Context Protocol – Anthropic	2025
DROP Certified Security Course (DCSC) – Cyber Security and Ethical Hacking	2023
Introduction to Linux (LFS101) – The Linux Foundation	2023

LEADERSHIP AND ACHIEVEMENTS

Founder and Maintainer – OpenDev AI, open-source autonomous GitHub security agent 2026
Founder and Maintainer – CodeCircle Tech Community, student AI and cybersecurity learning community 2025–Present
Member – Indian Society for Technical Education (ISTE)
Hackathon Awards: 2nd Runner Up – AI Ignite Hackathon • 2nd Runner Up – Shannon Codec Hackathon
Events: Bangalore Tech Summit (2024, 2025) • Open Source India (2024, 2025) • AI Developer Conference 2025 • Google Gemini CLI Workshop and Agentic AI Day • AI Security Community Bangalore 2026 • Yukti 2026 – VTU Belagavi • Electronics India 2025
